Profile

A highly motivated and detail-oriented software engineer with expertise in full-stack development. Possessing a strong foundation in front-end and back-end technologies such as HTML, CSS, JavaScript, Node.js, and databases like MySQL and MongoDB. Committed to developing high-quality software solutions that meet or exceed client expectations. Skilled in Agile methodologies and experienced in working collaboratively teams. Looking to leverage my technical skills and knowledge to contribute to challenging projects and drive business growth.

Education

B.Sc, Shenkar College Software Engineering

2019 – 2023

Full stack specialization.

Final Project – Streamline developed for the Kofar river restoration project, employing Node.js on the server side, React on the client side, and MongoDB for the database. The system efficiently manages data from sampling points, utilizes a water level sensor for real-time alerts, and offers a user-friendly interface with intuitive graphical displays.

Military Service

Operational IT operator, IDF

2015 – 2017

- Proficient in locating and addressing faults in advanced communication systems
- Experienced with tactical devices, broadband communication, LANs, command and control systems, and administrative computers.
- Skilled in loading cryptographic material and operating classified systems.
- Combat Support troop, I excelled in establishing communication cells and deploying mobile means during land force operations.

Work Experience

Office Manager, Yahav P.R.H, Ramat Gan

2019 – Present

- Managing direct contact with the company's board of directors.
- Supervised and monitoring of tasks to be performed.
- Providing a comprehensive administrative response to the CEO of the company.
- Management of management diaries.
- Responding to governmental institutions and private and public external entities.

Help Desk, Aviv Pos, Lod

2017 – 2019

- Support for operational problems both at the software and hardware level.
- Assistance in operating the system and providing training.
- Setting up printers and peripheral hardware with remote support.
- Solving network and internet problems.

Skills

- Has a high self-learning ability.
- Proficient in HTML, CSS, JavaScript, React and other front-end technologies.
- Experience with back-end frameworks such as Node.js and PHP.
- Knowledge of database management systems like MySQL and MongoDB.
- Familiarity with version control systems such as Github.
- Strong understanding of agile methodologies and project management
- Ability to work in a team and excellent communication skills
