Summary

- B.Sc. in Industrial Engineering and Management at Tel Aviv University.
- I have an experience in conducting data analysis, including generating reports across diverse time frames, creating forecasts based on future business plans and past sales data, and evaluating brand profitability by factoring in multiple variables.
- Self-learning ability.
- I possess strong interpersonal skills and exceptional communication abilities.
- Looking for a full-time job.

Skills

Python | SQL | R | Excel-advanced | HTML | ERD PLUS | Time management

Education

- **Industrial Engineering and Management**, Tel Aviv University [2019 – Present]
I have acquired expertise in developing, analyzing, and solving optimization problems, as well as creating simulation models for complex systems and performing analysis of production systems.
- **Moshel Scholarship Program** [2019 – Present]
I have developed my time management skills and enhanced my business English proficiency through participation in an English Business course.

Experience

Data analyst, Henkel [2022– 2023]

As a data analyst at Henkel, I utilized my skills in tracking daily sales data, generating segmented reports across different time periods, and producing monthly forecasts for the company's brands based on a combination of past sales data and future business plans. I also conducted detailed analysis of the company's product profitability, factoring in various variables.

National Service

General Intensive Care Unit, Assaf Harofeh Hospital [2017 – 2018]

During my National Service at Assaf Harofeh Hospital's General Intensive Care Unit, I provided valuable administrative support to medical staff and patients, demonstrating strong adaptability and efficiency in a high-pressure work environment.

Volunteering

- **'Yedidim' for Youth and Society** [2020 – 2022]
- Awarded “Outstanding Mentor” certificate for 2020-2021
