

## Summary:

A dedicated QA Automation Engineer with over 3 years of expertise in the cybersecurity field, known for a strong work ethic and a consistent track record in delivering top-quality results. Passionate about automation, skilled in designing, executing, and maintaining automated test cases using Playwright and Pytest. Proficient in identifying and resolving bugs throughout the software development lifecycle, with a proactive approach to prevent potential issues. Adept at integrating QA processes and ensuring optimal software performance.

## Skills:

- Automated testing frameworks with Playwright and Pytest in Python.
- Proficiency in cybersecurity methodologies and ethical hacking.
- Extensive Linux experience for testing and troubleshooting.
- API testing, web application security, and performance analysis.
- Experience working with Kubernetes, and managing KVM for virtualization.

## Experience:

### QA Automation Engineer at Cybellum (2020 – Current)

- Designed, developed, and executed automated testing frameworks using Playwright and Pytest in Python, reducing design bugs and high-critical issues by 40% through iterative test design, debugging, and refinement.
- Led continuous bug resolution during feature development, ensuring a more robust product.
- Pioneered the QA team as the first member in the startup, influencing the current team structure and dynamics significantly.
- Spearheaded projects that required rapid learning and knowledge sharing among team members, fostering a supportive learning environment.
- Managed diverse tasks across various teams, showcasing adaptability and contributing to different project scopes within the company.

## Accomplishments:

- Initiated and shaped the QA team as its founding member in the current startup. Played a key role in building and defining how the team operates today.
- Guided projects that required quick learning and teaching among team members, promoting a supportive learning environment within the team.

Managed various tasks across different teams, showcasing adaptability and contributing to diverse projects within the company.

Languages: Native Hebrew and High-Level English

Interests: Enthusiastic about sports activities, climbing, and socializing.
