

# HADAS RAZ

## SOFTWARE ENGINEER

### PERSONAL PROFILE

Experienced software engineer with expertise in various testing levels, including performance, functional, integration, system, and user acceptance testing. Proven ability to deliver high-quality solutions and thrive in overcoming challenges in software development. Highly motivated for success.

### AREAS OF EXPERTISE

- Proficient in C#, Java, Cobol
- Web Development skills: Angular, Bootstrap, Node.js, CSS, HTML5, JavaScript, JQuery, React
- Database expertise: SQL Server, Access
- Application development using Visual Studio.Net
- Strong grasp of Windows Forms, Entity Framework.Net, Xml, OOP
- Familiar with Unix, Linux, and Windows operating systems

### WORK EXPERIENCE

#### QA | NESS | BANK DISCOUNT | 2021- 2024

- Ensuring quality assurance in ongoing project at Discount Bank.
- Managing system for sending messages to customers and bank employees, and operational task system for the bank.
- Working with CRM interfaces, core systems, pension systems, and check clearing.
- Developing and maintaining SQL scripts for daily use.
- Participated in Agile ceremonies, providing insights into the development process.
- Planned and created API services for message sending and data updates in SQL databases using Postman.
- Designed models and created API services for message sending and data updates through Postman.
- - Managed end-to-end testing process, including specification, test case emphasis, test scenarios, schedule management, and ongoing collaboration with the development team.
- - Conducted functional, integration, interface, database, E2E, regression, edge, API, and other testing types.

#### Professional Project in Software Development

- Advanced memory game development using JavaScript, CSS, and HTML5.
- UI development for store management using Java and MVC.
- Developed an advanced website for attractions management with Angular.
- Developed computer games with advanced graphics using Processing.
- Designed and implemented a personal assistant with alarm, games, and ideas using Windows Forms.

#### Instructor | StartTech Program, Cyber Education Center | 2023-2024

- Specialized in Processing and C# programming.
- Proven track record in project-based learning, emphasizing source code comprehension and creative problem-solving.
- Executed personal projects involving unique computer games and creative solutions, tailored to user needs and individual learning pace.
- Installed and maintained systems.

### EDUCATION HISTORY

#### Certification in Selenium Automation Course:

2023: Successfully completed a Selenium Automation course at Winc Academy (Yoni Felnar).

#### Professional Studies for Software Engineering:

2021-2018: Pursued professional studies for a Software Engineering degree at the College for Management, Rishon LeZion

#### Post-Graduate Studies:

2018: Completed high school diploma.

### OTHER SKILLS

- - Analytical thinker skilled in designing database structures
- - Detail-oriented with strong problem-solving abilities
- - Solid understanding of software development principles
- - Committed to ensuring software quality through testing
- - Familiar with testing tools and frameworks
