

ABOUT ME

Hello! i'm Liana Navon

an artist and a third-year student at Tel Aviv University's art faculty. I combine theoretical knowledge from my university studies with practical skills gained through a graphic design course at Shenker. I seamlessly merge these facets into my personal creative process. Driven by a passion for creativity, innovation, and self-expression, I consistently produce thought-provoking artwork with a meaningful message. I strive to collaborate with clients and engage in artistic projects to refine my art and design, aligning them with each project's specific purpose and agenda. I am creative, ambitious, original, responsible. Using social media platforms, I promote sustainability, veganism, and gender equality.

• Collaboration with Converse All Star (global entity) - Sustainability Project

2019 - 2020

chosen with only ten other people from all over the world to take part in a special project dedicated to sustainability. Designed a print sample for the classic Allstar shoe using an innovative organic coloring technique. This innovative print technique that used Escherichia Coli, which, is a glow in the dark color that is manufactured for E-coli bacteria, contributed to reduction in emission of harmful particles to the environment. While this technique is still in its trial period it has the potential to transform the process of manufacturing shoes such that it is less harmful to the environment. The shoe with my design was uploaded to a virtual store in Australia and all sales were donated to Take 3 For The Sea, an organization that focuses on reducing contamination of the ocean with garbage and specifically plastic.
