Profile: Electrical engineering student at Ariel University. In search of a student position in the industry.

During my studies I'm developing my learning skills and the ability to work and collaborate in a team. I am confident in both my knowledge and capabilities, and I am eager to perform to the highest standard

Education:

Present Bs.c in electrical engineering, Ariel University.

Third year. Current GPA:80+.

Pre-Project:

Image of a smart greenhouse control for growing cannabis to simulate a suitable microclimate through the use of sensors and microcontrollers.

Relevant courses:

- Introduction to electricity – Grade 94
- C++ - Grade 84
- literature systems– Grade 100

Career:

2021-2022 Standard Institute of Israel - I currently work at the Electricity and Electronics Laboratory at the "Israeli Standards Institute" (student position).

- Performing electrical and mechanical product test.
- Effectively use test console, electrical meters, and electronic test equipment (Oscilloscope, Pulse Generator etc).
- Test using hand tools, mechanical measuring, and fitting equipment.

Military Service:

2013-2016 Served as a combat soldier in the Givati Brigade.

Technicak Skills:

- Experience with Microsoft Office.
- Experience with C++, Python.
- Experience with PSIM, PSPICE & MATLAB programs.
- Languages – Hebrew (mother tongue), English (very good).

Skills

- Quick learner, ability to understand things quickly and pay attention to detail.
- Great interpersonal skills, able to work well with a team.
- Highly dedicated to the job, able to work under pressure, meets deadlines and strives for excellence.
- I am eager to perform to the highest standard.
