EXPERIENCE

weSend(WS) - now it's Bondi

Over the past few years, I have made a decision to help small businesses optimize their businesses and make them reflect confidence and stability to their clients.

This application was developed in React for the Frontend and Node.js Express

for the Backend and Mongo Db.

But now is developed in Vue for the Frontend and Node.js Express for the Backend and Sql.

Me and my team Build and Design a Management Client System for small businesses.

Top education (company):

During this year and last year I taught at school grades Python in advanced level for eighth to twelfth graders and App Inventor for seventh graders, And I submitted them to the end-of-year test successfully.

EDUCATION

Ruppin Academic Center, Emek Hafer — Degree

OCTOBER 2020 - Currently studying

First degree in computer engineering

PROJECTS

Detect Fake New with LLM — Chat Gpt

As My final project in my first degree I create a model that can detect fake news according to input that he is given and say if the input is real or fake and is percentage, this project I will present in a Research institute in Italy.
