Possesses a software engineering certificate with an extension of studies in collaboration with She codes - track emphasizing in data analysis and a Python Backend Developer Bootcamp graduate which focuses on Python, emphasizing industry best practices like git, FastAPI for secure backend development, and unit testing.

Ambitious, with high logical thinking, willingness to invest and motivation to succeed.

Has self-learning ability, and excels in working with a team.

passionate and always ready to deep dive into new fields and technologies.

with a strong Full stack background,

Looking for a challenging job in the field of development.

EDUCATION

2023-Present | Python Backend Developer, Elevation - [Course Page](#)

An intensive 1-month coding Bootcamp that deep-dives into Python while highlighting industry best practices such as working with git, building a secured Python backend with FastAPI and unit testing.

Final project: Graph Visualization Web Application - An entire stack project, combining a Python server implemented with FastAPI, an SQL DB, and using external APIs. The front end is implemented with React. Working with a graph data structure to visualize and manipulate the graph data.

2021-2023 | Software Engineering - Mahat (Governmental Institute for Technological Training), Beit Yaakov Institute for Teachers

Graduated with honors, GPA - 97

Final Project: Developed a smart laundry basket for efficient laundry management, sorting the inventory of clothes, scheduling & schedule management, inventory management, access authorization management.

The technology used:

Backend: C#, ASP.net.

Frontend: React .

DB: MongoDB.

Client site development project - development and design a virtual store for management and sale vacations,

Using Redux-React, Bootstrap

Design Patterns project - building a smart system for managing a beverage machine including usage Design patterns in c#, characterizing UML diagrams.

2018-2021 | Technological certification certificate, on behalf of the Ministry of Education, Management and Human Resources, Beit Yaakov Institute for Teachers

- Graduated with honors, GPA - 98

TECHNICAL SKILLS

Frameworks: React

Client Side:

JavaScript (ES6), HTML, CSS

Server Side and DataBase: Python, FastAPI, SQL,

Pymysql, Pytest, C#, C, Java

Website development: html, css, Js, bootstrap,

React, React-Redux, Node.js, Asp.Net,

Database: SQL Server, NoSQL - MongoDB

Advanced technologies: html5, webAPI, Mevan,

Java8, Entity Framework, BI, AI, Spring, .NetCore,

Tools: Git, working in collaboration in Github

LANGUAGES

English Professional working proficiency

Hebrew Native/bilingual proficiency

VOLUNTEERING

2021-2023. Elderly care at Matav association
