SUMMARY

Results-oriented Data Analyst with a proven track record of leveraging Python programming skills to extract actionable insights from complex datasets. With two years of hands-on experience in data analysis, I have consistently delivered valuable business intelligence to drive informed decision-making.

EXPERIENCE

Data Analyst

Israel Competition Authority 2022 - Present

Highly proficient in Python programming language with a strong understanding of its core concepts and features.

Developed and implemented efficient algorithms and data structures in Python for various projects. Applied Python for diverse purposes, including data analysis (pandas, networkx, dash, Pytesseract, transformers and PIL)

Experienced with Natural Language Processing (NLP) techniques and tools, with hands-on experience in deploying NLP models using Python

Familiarity with NoSQL databases, specifically working with Relativity Server, ensuring flexibility and scalability in handling unstructured data.

Demonstrated expertise in integrating and interacting with multiple RESTful APIs for data retrieval in various applications.

Implemented data synchronization processes by efficiently querying and consuming APIs to ensure real-time and accurate information retrieval.

Experienced with Version Control Systems (Git)

SKILLS

- Python
- SQL

LANGUAGES

- Hebrew (native)
- English
