

SHIREL GOLDENBERG

INFORMATION SYSTEM ENGINEER

As an Information System Engineering student, I am excited to embark on my professional journey as a Software Engineer. I have a strong academic background and possess a solid foundation in programming, data structures, operating systems, and database systems. Eager to apply my technical skills to solve real-world problems and contribute to the growth of a dynamic organization. Quick learner and possess excellent analytical, problem-solving, and communication skills, which will enable me to work collaboratively. Seeking a student position where I can gain hands-on experience, learn new technologies, and grow professionally as a Software Engineer.

Work History

2022-04 - A Doctor's Secretary

Current

Dr.keret, Haifa

- Answers calls, and speaks with clients and lawyers to solve their problems.

Current

Self-employ , Haifa

Gives private lessons in English and mathematics

Projects

APACHE AIRFLOW PROIECT

<https://github.com/shirel-G/daily-news-bot>

Deployed Airflow with docker-compose and wrote a DAG that every day fetches medium stories about topics that I want and saves them on my computer ready for reading.

CEMS PROJECT

<https://github.com/shirel-G/Cems>

A mid-degree project, built a test management system where we created tests, questions, saw test statistics and even performed them.
