

## Objective

---

Ambitious self-motivated computer science student (Last Semester). Looking for a developer position at a leading hi-tech company, to leverage my skills in development.

## Skills Summary

---

### Interpersonal Skills

- Creative problem solver
- Self-Learner
- Strong communication, and collaboration skills.

### Programming Skills

- |           |        |               |
|-----------|--------|---------------|
| • Flutter | • Java | • Java Script |
| • Dart    | • C#   | • SQL         |
| • YOLO    | • C    | • Bash        |

## Education

---

Present: **Computer Science** - Netanya Academic College, Israel.

**GPA: 96.5**

### Projects

- **Object Detection Application:** A mobile application that detects cutlery tools such as fork and spoon. developed with flutter, using YOLO algorithm and TensorFlow framework.
- **Lane Detection:** Autonomous self-driving car that overtakes another car in the lane and returns to its lane in front of the other car – Project Currently In-Progress.

### Main Courses

- Object Oriented Programming in Java – **Grade: 100.**
- Basics Of Web Development – **Grade: 100.**
- Windows Programming (C#) – **Grade: 100.**
- Formal Languages and Automata Theory – **Grade: 100.**
- Algorithms 2 – **Grade: 95.**
- Computer Networking – **Grade: 91.**

## Volunteer Experience

---

2021 – 2022: Volunteered tutor at Perah-Project.

## Languages

---

- Arabic – Native Speaker
- Hebrew – Highly Proficient
- English – Highly Proficient
