### professional experience

#### Sales Website Development

- Utilized JavaScript with a focus on design and precise coding.
- Developed a responsive website incorporating advanced HTML5, CSS3 features, animations, and efficient logical coding.
- The site includes menus, forms, and other interactive elements.

#### Advanced Task Management Platform

- Integrated server-side and client-side using .NET Core and JavaScript.
- Developed an advanced API interface for authentication and authorization based on tokens.
- Enabled users to log in and manage tasks with permissions, featuring advanced task management and a smooth user experience.

#### Job Listing Website

- Combined server-side (C#) and client-side (Angular) technologies.
- Created a user-friendly platform for job seekers to log in, search, and filter job listings by field or location.
- Implemented a resume upload feature directly to the site.
