## SKILLS SUMMARY

- Python
- C
- Java & JavaScript
- SQL & MongoDB
- Linux
- React
- Object Oriented Programming
- NodeJS

## PROJECTS

- VidWizard (React, Node.js) - Designed and implemented an AI-driven web application for streamlined video creation with features such as voiceover, subtitles, etc.
- Application for secure email exchange (Python) - Application for secure email exchange, encryption/decryption, secure key delivery, and digital signature using a hash function.
- React & Express (Node.js) - Led the creation of a webpage integrating OpenAI API for content generation.
- React Blog (Next.js) - Developed a dynamic blog platform with interactive features.
- Zerli (Java) - zer4u Web application with a client-server architecture. (Server-side programming)

## PERSONAL PROFILE

Junior Software Engineer & Practical Electronics Engineer (Graduated with Honors).

My work experience reflects my ability to collaborate effectively in different teams, demonstrate a strong work ethic, adapt quickly to new environments, and excel as a self-learner.

Eager to leverage my skills and problem-solving abilities to contribute to the development of innovative software solutions.
