Experience

Tash Metal / December 2022 - November 2023

Led the designing of the urban and outdoor furniture featured in all catalogues of the metal factory, as well as designing the catalogues themselves. gained expertise in production methods and the unique abilities of metals, refining my skills at the intersection of creativity and manufacturing.

Freelance Industrial Designer / June 2022 - Current

Designing outdoor sports facilities for Urbanix, which is a company that specializes in those facilities. I started to work with them while working for ON Engineering, and nowadays I work with them independently regarding the development of the new sport machine line of the company.

TAGA Design Studio / November 2021 - July 2022 / Tel Aviv, Israel:

Worked as a part of a team of Industrial Designers, I worked for long term projects, starting from concept development research, benchmarking until final design and final development of the product in the market. Designed many medical products, which are engineering complex.

ON Engineering / August 2020 - November 2021 / Caesarea, Israel:

I was responsible of the whole department of the Industrial Design in the company. I gave design solutions for the clients. I did that while taking into account the clients' vision and engineering constraints. During my work there with the engineers, I learned a lot about production methods, techniques and materials. I designed there very diverse products, from outdoor furniture to medical products.

Education

2018 - 2022 / Bachelor of Design / Industrial Design / Shenkar College of Engineering and Design / Ramat Gan, Israel

Miscellaneous

- My final project of studies dealt with designing a new solution for encouraging people with life-threatening allergies to carry their Epinephrine injector. I developed and designed a wearable smart bracelet which combines with a divided injector that syncs with a mobile app that I also designed.
- Perach project: I volunteered as a tutor for children from low socioeconomic status families.

Military Service

2012 - 2014: During my first year of my service, I was a head office soldier in the Ministry of Defence. Later I moved to an Aluf office and was part of a team of soldiers that operated the office needs.

Summary

I'm an Industrial Designer, graduate of Shenkar College in Israel from the Industrial Design Department. I have more than 4 years of relevant experience in Industrial Design. I'm looking for a full time job that is also challenging and developing.
