I am a DevOps Engineer, AWS Certified highly motivated and always want to learn more.
Specializing in automation and robust CI/CD pipelines. A creative thinker, motivated in
delivering high-quality results

PROJECT

Developed and wrote a Python-based weather application. Containerized the app with Docker for consistent deployment, implemented a CI/CD pipeline using Jenkins and GitLab, automated continuous deployment with ArgoCD, used Terraform for infrastructure provisioning, and deployed on AWS EKS with an Application Load Balancer (ALB). Technologies used: AWS, EKS, Python, Docker, Jenkins, GitLab, ArgoCD, Terraform, ALB.

TECHNICAL SKILLS

System Admin - Bash, Linux
Coding languages - Python, C, C#, JavaScript
Infrastructure - AWS (CCP), Terraform, Ansible
Version Control - Git, GitLab, Github
Containerization - Docker, Kubernetes, Helm Charts, EKS
CI/CD Pipeline Tools - Jenkins, Git Actions, Maven
Storage - SQL, NOSQL, Redis
Monitoring - Grafana, Prometheus, ELK

Infinity Labs R&D, DevOps hands on program 2023 - 2024

- Implement CI/CD principles with Jenkins Docker and GitLab
- Experience with Kubernetes clusters with helm charts and EKS
- linux, automated programming languages: Python, bash, C
- Certified Cloud Practitioner in AWS, Cloud Formation, experienced with Terraform
- Deep understanding of database and Storage

LANGUAGES

Hebrew: Native
English: Professional
French: Intermediate

EDUCATION

- Practical Software Engineer, College of Management Ashdod (GPA 93)
- Amazon Web Services - Certified Cloud Practitioner (CCP)
- Infinity Labs R&D - Unique DevOps Training (1000+ hours SDLC)
