

An industrial and management engineer with extensive and diverse experience in project, material, demand and planning management alongside development and implementation of analysis tools, within global companies, across the food and beverages, pharmaceutical, cosmetics, and banking industries.

As a team player, I possess strong analytical skills, attention to details, and an inclination for accuracy, managing and leading changes and processes, both within organizations and across them.

### **Experience**

#### **2021 – 2024 Material & Supply Chain Planner and Analyst, Prodalim Group (Leading juice solutions provider)**

- Ensuring optimal product availability, by overseeing global S&OP process management, end to end demand and material planning, product allocation optimization and risk management in a global dynamic environment, supporting 20% revenue increase at a \$300M annual business
- Managing, controlling and balancing of inventory levels, considering customer specifications, lead times, different supply constraints and other factors
- Collaborating proficiently with cross-organizational interfaces, including procurement, logistics, sales, and quality control, to ensure alignment with customer specifications, demand and supply objectives, and quality metrics
- Defining, developing, and implementation of advanced tools for analysis, control, and monitoring (utilizing Excel/BI), aimed at scrutinizing various data related matters, such as sales pace, forecast accuracy, and quality metrics
- Leading internal and cross-organizational processes for analysis, control, and process improvement

#### **2018 – 2021 Project Manager (PMO), Orantech, in two projects:**

- **Teva Pharmaceuticals - Implementing FDA-aligned production & protocol changes for anti-counterfeiting**  
Managed project budgets and schedules, integrating teams and systems to upgrade production lines for FDA compliance. Presented data and reports to senior management
- **Mizrahi Tefahot Bank - Development of a procedural change management system**  
Managed project scope (budget, schedule, tasks) and facilitated cross-functional collaboration (business, developers) for project presentation to executives

#### **2016 – 2018 Supply and Demand Planner, L'Oréal Israel**

- Perform planning, considering product lifecycle, promotional campaigns, and product launches
- Executing purchase orders and managing the process, from initial order to intake, collaborating with marketing managers and global logistics stakeholders.
- Managing, controlling, and optimizing inventory levels, considering lead times, buffer stock, and various constraints
- Achieved inventory storage level targets while streamlining supply services and reducing surplus inventory
- Characterization, design, execution and implementation of a specialized inventory report, for sales and warehouse teams, leading to reduced inventory days, cost efficiencies, and enhanced real-time sales capabilities

#### **2013 – 2015 Medical file management Systems Implementer – Ness Technologies Israel**

- Received high recognition and honors for streamlining implementation processes of Chameleon system

### **Education:**

#### **2012-2016 B.Sc in Industrial Engineering and Management, cum laude, Rupin Academic Center**

### **Technical skills:**

Very high level of Excel | SAP | Visio | Microsoft Project | QlikSense
