Hebrew - Native
English - Fluent
Spanish - Fluent

As a curious, enthusiastic, highly motivated, and hard-working software developer,
I am seeking a challenging software developer position.
I have a passion for coding and a desire to continue learning new technologies and methodologies.
With my fast learning abilities and team player attitude, I am excited to bring my skills and passion to
a dynamic software development team.

Personal Projects:

- **Social-media Website Application:**
  A web application with the possibility to register, sign in/ out, add/remove
  friends, share and like posts and upload photos.
  Developed with the MERN Stack technology.

- **E-commerce Website Application :**
  An online store with some features like: register, login/ logout, order products which
  includes the payment processing, shopping cart, search filters.
  It required characterization, planning, involvement in infrastructure and
  architecture, visualization up to actual programming both on the
  server side (Node.js + Express + MongoDB) and on the client side (React).

- **To-Do List Website Application:**
  A task management application for organizing and tracking tasks and to-do lists.
  Including the CRUD functions, Using VScode, JavaScript, Node.js, React, MongoDB.

Skills:

- Experience with the MERN stack technologies.

- Strong proficiency in programming languages such as Python, Java.

- Strong understanding of algorithms and data structures.

- Experience in software development, Rest API and version control with Git.

- Experience with databases such as SQL server and MongoDB.

- Familiar with Linux and command-line tools.

- Familiar with Docker and Kubernetes.

Education:

- B.Sc Computer Science - H.I.T - Holon Institute of Technology (2018-2021)   GPA:90

- QA Manual Testing & ISTQB certified - John Bryce collage (2017)

Military Service:

- Full military service in Israeli Air-Force as logistics officer (2010-2013)
