GIVATAYIM, ISRAEL

OBJECTIVE

Self-taught network engineer with a demonstrated history of resolving complex networking issues and designing robust infrastructures. Four years of experience in the field, including international project implementation, customer collaboration, and expertise in BGP and data center architecture.

SKILLS & ABILITIES

- Network Design and Implementation
- BGP Protocol in Cloud Environments
- Data Center Architecture
- Network Security and Mitigation
- Customer Relationship Management
- Hardware Installation and Configuration
- Project Management
- Troubleshooting and Issue Resolution
- Scripting experience with Python

EXPERIENCE

2022 – September 2023

Network Engineer - Radware (acquired Securitydam) | Tel Aviv, Israel
- Lead design and infrastructure projects, specializing in data centers with a focus on BGP protocol.
- Successfully executed projects in foreign countries within tight deadlines, emphasizing efficient project management.
- Proficiently manage routers, switches, load balancers, firewalls, security mitigation devices, ESX, storage units, and other network equipment.
- Plan, install, and configure data center hardware components, ensuring optimal performance and connectivity.
- Coding experience - working with python to perform tasks quickly and efficiently.
- Working with Linux operating system, operating network devices via API interfaces.

2021 – 2022

Network Operations Expert (Tier 3) - Securitydam | Tel Aviv, Israel
- Served as a dedicated resource for NOC, R&D, and onboarding departments, resolving complex infrastructure stability issues.
- Conducted testing of new features and functionalities within a 24/7 operational environment.
- Collaborated with Fortune 500 companies to ensure high-level service quality and uptime.

- Part of a team that monitors and responds to around-the-clock DDoS incidents and network infrastructure incidents.
- Interface daily with Fortune 500 clients equipped with excellent customer-facing training and long experience in the US, EU, and APAC markets.

ACHIEVEMENTS AND ADDITIONAL INFORMATION

- Successfully executed massive migrations from DDoS-only to combined DDoS and WAF solutions without downtime, across international locations including Frankfurt, London, Dubai, South Korea, South Africa and more.
- Identified and remediated stability and security issues within the product, collaborating effectively with cross-functional teams.
- Self-taught individual, skill which got me to get my promotions throughout the years.
- Skilled in managing customer relationships and delivering large-scale projects effectively.
