Skill Highlights

- C#, .NET
- Java
- Python
- JavaScript
- NodeJS
- MongoDB
- GraphQl
- SQL

Languages

Hebrew – Native Language
English – Fluent

Summary

BSc Computer Science and Mathematics and am motivated to learn with self-learning ability.
I possess strong technical skills, am well-organized, and highly motivated.

I am actively seeking a full-time position as a Backend or Full Stack Developer at a company that offers opportunities for continuous learning, professional growth, and a chance to stay at the forefront of technology.

Work Experience

2021 – 2023 Mobile Tornado – Rosh Haayin, Israel.
Software Engineer - C#, WPF.

During the job, I used the following technologies and tools: C#, WPF, GraphQl API, multi-threading, MongoDB, Jira, and Azure. I worked in a team environment, collaborating with other teams and fulfilling customer requirements.

Projects

Workforce Management - This project was started from scratch with the main purpose of preparing shift schedules for employees, which are managed by the foreman. In this project, my responsibilities included organizing and managing a substantial amount of data received from the server and effectively presenting it to the foreman.

Lone Worker - This project was initiated from the ground up with the primary objective of monitoring employees who work alone in the field. In this project, our goal was to create user profiles that encompass various reporting requirements for employees during their shifts. To ensure worker safety, we implemented a mechanism that triggers an alert if an employee fails to send the expected message on time or if the connection with the employee is lost.

Both projects utilize **C#** and **WPF** for **desktop application** development. They make use of **multi-threading**, **GraphQl** for server communication, and **MongoDB** for data storage.

Education

2019 – 2021 BSc - Computer Science and Mathematics in Ariel University.

National Service

2017 **Boarding School Advisor, Negba Association**
Advisor for 15 at-risk teenagers, responsibilities included private tutoring for tests, day to day logistics and emotional support**.**

2016 **Analyst, Ministry of Defense**
Technological analyst for the Office of the Prime Minister. Content and details of work classified.
