Experienced in the creation, development and support of IT infrastructure. The main directions are Windows servers, automation and monitoring. Extensive experience in networks, scripting, troubleshooting and user support.

KEY SKILLS

- Windows Server
- Scripting and automation
- Monitoring and alerting
- Networking and VPN
- User support
- Cloud infrastructure support

OTHER SKILLS

AD, policies, CA, RDS-farm, Veeam, automation (PS, cmd, bash), Zabbix, Prometheus, NAS, DB (PostgreSQL, MSSQL), Linux, Terraform, GIT, Docker, virtualization (HyperV, VMware), Mikrotik, Wi-Fi Mesh, IP-telephony, VPN

LANGUAGES

English   Advanced technical
        Intermediate spoken

Hebrew   Beginner

Russian   Native

EDUCATION

Moscow Power Engineering Institute
MSc (5,5 years)
Computer Systems and Networks
Completed in 2011

WORK EXPERIENCE

Newton Technology | Senior System administrator
Application developer for "Gazprombank Investments"
2021 – 06.2023
Maintenance of the infrastructure for 500+ employees.
- I created a fault-tolerant RDS farm for 200+ employees,
- deployed monitoring of the Windows infrastructure on Zabbix for 200+ hosts and network devices,
- created over 30 AD policies for automating software installation and executing information security requirements,
- set up and configured many servers for various company needs.

Install and support for servers in cloud and in data center. Troubleshooting and advanced user support. Automate processes with PowerShell. Maintain documentation. Experience working with DevOps, Development and Information Security teams.

Matrix | System administrator
2011 – 2021
Comprehensive IT service for 30+ organizations up to 60 workplaces (250+ workstations and 60+ servers in total).
- I created a centralized server and hardware monitoring system,
- systematized backup in all organizations and created special monitoring for it,
- provided user support for all technical issues.

Setting up office equipment, IP telephony, organizing a local network, providing network connectivity for branches. Setting up local and cloud servers. Maintain documentation.

School №846 | System administrator
2004 – 2011, part-time
At the beginning - support for a small school network, then the park grew to 150 workplaces (due to mobile classes consisting of laptops) and 2 servers.
I implemented AD and automated some processes to make interaction between teachers and students easier.
