An experienced software developer fluent in English, I hold a B.Sc. in Computer Science from Tel Aviv University and am highly motivated to pursue a full-time development role.

Experience:

2017-2021: B.Sc in Computer Science and Management (Big Data Program), Tel Aviv University.

2022-2023: Software Developer, NCR Company

- Collaborated with leading customers in Italy to plan, develop new features, fix bugs and lead extension developments for the company's product.

- Developed server-side and client-side using C# and WPF in Visual Studio.

- Worked as part of a development team from Israel and Italy utilizing TFS for task and code management.

- Technologies used: C#, .NET Framework/Core, NHibernate, RabbitMQ, WPF - MVVM Pattern, MSSQL, Design Patterns, Postman API.

Education:

2017-2021: B.Sc in Computer Science and Management (Big Data Program), Tel Aviv University.

During this time, I've done the following projects:

- Building a cross-platform Android And iOS app by using C# and Azure services in Visual Studio with Xamarin.Forms.

- Building an interactive Sudoku program in C with an Integer Programming solver component.

Program Skills:

Programming Languages: Python, C#, HTML, CSS, JavaScript, Java, C.

Working Environments: Git, Visual Studio Code, Azure, Visual Studio, TFS, MSSQL, Postman API.

Frameworks: .NET, .NET Core, NHibernate, RabbitMQ, WPF.

Languages: Hebrew: native, English: fluent.

Military Service:

2012-2015: Full service at Unit 9900, Intelligence Corps.
- Served in an operative section with a high-level classification in the field of Cartography.
- Collaborated effectively with colleagues and superiors, delegating tasks based on individual strengths to ensure accurate and efficient completion of assignments.
- Consistently exceeded expectations in meeting deadlines and handling high-pressure situations while demonstrating exceptional precision and attention to detail.
