Yosef Geller Software development student

TRAINING

2023-2024: Software Engineering Technician Studies at the Haredi College for Professional Training through the 'MEGO' program

- I completed a Full-Stack course on behalf of the Elevation company. In the course, I acquired extensive knowledge of advanced technologies in website development and management using popular libraries and technologies such as React, NodeJS, Firebase, API use and more..
- Congratulations! I successfully completed a comprehensive Python programming course with a grade of 91%.
- As part of the course, I did a variety of projects based on Python:
  - Tetris game using OPP and the pygame library,
  - Customer management system using a client server system (link to Git-Hub is attached).
- During my studies, I acquired in-depth knowledge in algorithms, data structures, OOP, operating systems.
- We also learned the basics of working with SQL and MongoDB databases and a basic course in Cisco computer communication.
- I received industry preparation, implementing workflow processes, utilizing Git/GitHub, and teamwork skills.
- I also underwent a 3-month preparation for graduation exams, where I scored 98% in mathematics.

EDCATION

2014-2021 Continuing studies at Kollel Avrach
- In-depth study of practical Jewish law

2017-2023 Administrative work in an architects office
- In-depth study of the Babylonian Talmud.

WORK EXPERIENCE

2019-2022: Managing a nonprofit organization and coordinating communal and social activities in Kiryat Ata.
Responsibilities included administrative management of the organization, coordinating volunteer activities, liaising with government offices, establishment and management of a synagogue, and fundraising

2017-2023: Administrative management at an architectural firm.
Building a website, working with clients, responsibility for collaborations, computing, office development and organization, handling building permits and technical processes.

VOLUNTARY EXPERIENCE

2013-2020:
Volunteering in an activity for Russian-speaking Jews to integrate them into society and deepen the connection to Judaism and tradition, the volunteering included trips to Jewish communities in the countries of the former Soviet Union.
During the volunteering I accompanied immigrants in Israel and Russian-speaking Jews in different countries,
I prepared boys for Bar Mitzvah, traveled to Jewish communities and managed the Jewish activities during the holidays.

2010-2011:
At the same time as my studies at the yeshiva I volunteered at a charity organization for yeshiva students from families of a low socio-economic level, the volunteering included donating and helping students in the amount of about NIS 300,000 per year.

PROFILE

I graduated with honors from a software development course, learned programming in Python and JavaScript languages.
I have strong abilities in task integration and management, and I am very passionate about the world of software development and problem-solving. I am confident that I have great potential to succeed in this field.
I possess high self-learning capabilities and dedicate a lot of time to expanding my knowledge.
I am ready to take on challenging tasks, even those that require a significant amount of effort. I believe that with my persistence and motivation, I can integrate into a team and contribute greatly to its success.

SKILLS

- High technical ability
- creativity
- determination
- Self-learning
