ABOUT ME

I am a versatile Full Stack Developer with expertise in ReactJS, Bootstrap, MUI, and styled-components for creating visually appealing and responsive user interfaces. Proficient in Node.js and Express, I have hands-on experience in building robust and scalable server-side applications. My knowledge of MongoDB allows me to efficiently handle database management and integration. With a strong command of Git and GitHub, I ensure effective version control and collaboration in development projects. Additionally, my familiarity with AWS enables me to deploy and maintain applications in cloud environments. I am passionate about leveraging these skills to deliver seamless and efficient web solutions.

WORK EXPERIENCE

(2015 - 2019) : Team leader and supervisor at a maintenance company.

(2021 - Now) : Works as a freelancer in website development for businesses.

PROJECTS

Quick Site

I developed the Quick Site platform mainly to deepen and enrich my knowledge in the field and to gain experience. Quick Site is a creative platform that allows you to develop websites quickly by editing images and text to your wish.

The platform was built with **ReactJs**, **TypeScript**, **Bootstrap, MUI**, **styled-components**, **NodeJs**, **Express** and **MongoDB**, The project is managed and deployed on **Github** via **CodePipeline**, and hosted on **AWS** using **S3, Route 53** and **Elastic Beanstalk**.

Fixer

I developed the Fixer platform to enrich and develop my knowledge in Full Stack with an emphasis on the server side.
In this project I performed authentications and authorizations with JWT and Nodemailer and Bcrypt, Socket.io, convert files to PDF and more.

EDUCATION

(2019 - Now) :
Computer Science student B.Sc. At the Open University, there are two semesters of studies left and an average grade of 90 as of now.
