Profile

My name is Ram, a 23-year-old from Holon

I am a graduate of the information security and ethical hacking course at HackerU. I excel in problem-solving, automating repetitive tasks, and implementing secure network access controls. I am eager to apply my knowledge and abilities in a dynamic work environment.

Professional Experience

IT Level 2, *Ness Technologies*
07/2022 – 03/2024 | Tel Aviv
Developed and implemented PowerShell scripts to enhance team efficiency, focusing on AD automations, information gathering, folder permissions, and Windows/Exchange environment optimizations.

Managed user accounts and maintained detailed records of folder permissions and ownership.

Provided online customer support for a user base of over 50,000.

Facilitated training and onboarding for new employees.

Managed critical operations and addressed tickets via phone, email, and CRM.

Established documented work procedures to ensure operational consistency.
